

Symmetry and Sweetness on Sarasota Bay

This client has a love for color, symmetry and balance—three words that make our hearts sing. From the driveway patterning to the pops of purple everywhere, this landscape is a delight for the senses.

Every detail of this landscape design worked in harmony with the architecture to create a sweet juxtaposition of hard and soft. Expanses of hardscape were softened by paving pattern and plant material. Wide views of the pool and bay were accented with the breezy brightness of Muhly grass. Topiary, vine, boulder and brick were all part of the palette for this Bird Key beauty.
