

Synergy of Landscape and Culture

This project was special in every sense of the word. A designer's dream come true, this waterfront acre was transformed, through careful collaboration and research, into a cultural oasis for a worldly family. The result is a marriage of east and west, of exotic and native, of intimate and expansive. The Casey Key Pagoda Garden is our most award winning garden to date.

We designed and coordinated the installation of every element within this special project, including an English Rose Garden, a custom glass conservatory, a zen garden and yoga deck encircled by bamboo, a series of traditional Chinese Pavilions anchored by a pair of moongates, a Koi Pond and refugium, the creation and siting of several art pieces, and a plant palette comprised of over three hundred species, with over a hundred edibles. The materials were chosen for their success in Southwest Florida, yet their application transports guests to other worlds. The Casey Key Pagoda Garden is a magical place.
