

## A Contemporary Classic on Longboat Key

The design for this project, inside and out, reflects the love of modern art and architecture shared by the homeowners. The architect and builders responded with clean lines and angles that created ample opportunities for an exciting integration of the home with its waterfront landscape.

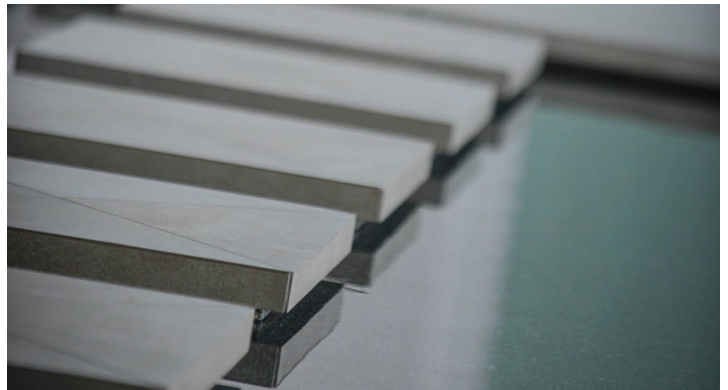

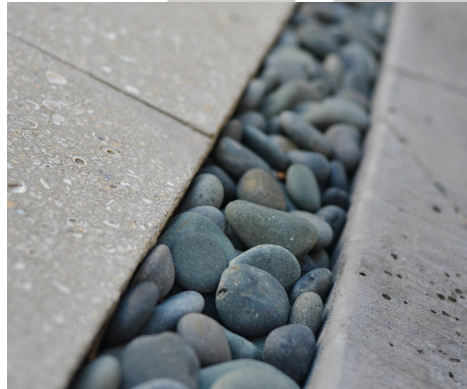

Punctuated by a custom dichroic glass kinetic art piece, this home adds a modern signature to a well-established neighborhood. The lines of the driveway, the series of planters, and the art piece all work together to bring one's eye to the front door. The result is a cohesive, contemporary approach to the Longboat Key lifestyle.
