

Remarkable Renovation on the River

This renovation illustrates our ability and excitement to execute complete exterior general contracting coordination services. In addition to reconceptualizing the design for the swimming pool, entertainment areas and circulation in this family's backyard, we redesigned the rear facade of the home, right down to the paint color.

The result is a cohesive expression of outdoor living.

Our scope of services for this riverfront renovation included a complete reimagining of the home's rear facade. Through several iterations of concept, using hand drawn and digital mock-ups, we were able to create a new vision for this young family's outdoor living experience. The pool area was transformed from one that was uninviting and cramped to one that is adequate to celebrate the home's river frontage.
