

## Modern Renovation on Midnight Pass

This dramatic, modern renovation on Midnight Pass combines fresh, clean, Gulf inspired hardscape materials with a native coastal plant palette and playful pops of color. Significant earthwork brought the dune systems right up to the rear facade of the home. The result is an oasis that settles neatly into its piece of Turtle Beach paradise.

The hardscape for this project was completely revised, complementing the clean architectural lines of this oceanfront renovation. Regrading and recirculating the back of the property integrated the dunes right up to the home, creating a sense of unity and belonging with the Gulf frontage. Across the private street, an Intercoastal kayak launch beckons.
