

## Asian Inspiration in a Playful Gulf Garden

The owners of this custom built home on Casey Key have an affinity for the Asian-inspired aesthetic. In addition to creating a garden rich with texture and color, our scope of services included the design of focal entry pieces, water features, earthwork, and the location of an impressive collection of statuary.

A custom moongate sculpture greets guests and frames the spectacular views of this special home and its Gulf frontage. A limestone boulder water feature provides a soothing entry experience. Several playful art pieces are tucked within a palette of unique specimens and native coastal plants. The backyard is a soft, expansive haven for dogs and people alike, and celebrates the waterfront lifestyle.
